

EUROPE'S LEADING UNIVERSITY AI CLUBS

AI Summer Research Program

A pan-European research competition that invites students across the continent to submit original **AI & machine learning** research, be judged by local researcher juries, and compete for a place in a single global final.

UG-PhD OPEN TO ALL LEVELS	AI / ML FIELDS OF RESEARCH	8+ COUNTRIES	1 CONTINENTAL FINAL
-------------------------------------	--------------------------------------	------------------------	-------------------------------

WHAT IT IS.

Working with Europe's foremost student AI societies, EuroTech Federation runs a summer-long research program in AI and machine learning. Students submit research through their local club, where it is evaluated by a **local jury of researchers** through double-blind review. The strongest papers from every local competition are invited to a **global final**, where finalists from all countries present to an international jury that names the overall winner.

HOW IT WORKS.

01 Submit Students submit AI/ML research through their university AI club.	02 Local jury A jury of researchers evaluates each entry through double-blind review.	03 Local winners The best papers from each competition advance to the final.	04 Global final Finalists present to an international jury that names the winner.
--	---	--	---

WHY IT MATTERS.

Research at European scale

Promote and showcase student research across the whole continent, not one campus at a time.

Connections between labs

The researchers who staff local juries become bridges between institutions and labs.

A network of AI clubs

Tie together Europe's leading university AI societies through a shared annual event.

FOUNDING AI CLUBS.

ETH Analytics	EPFL AI
Oxford AI	Imperial AI
BAINSA	Aalto AI
42 AI	KSE

ALREADY ON BOARD.

- **Former President of the ERC**, advising the program
- **Compute provider**, infrastructure for finalists
- **LLM credit providers**, model access for research

TIMELINE.

Jun	EuroTech Summit · Paris · program launch
Jul to 31 Aug	Submissions open · local competitions
Sep	Local jury review · double-blind
Oct / Nov	Global final, Paris · finalists present to the jury

Let's build a research network across Europe, together.

We're building a pan-European reviewer network of researchers across leading university AI clubs. We'd love to have you involved.
